

# Gaining control over your warehouse

Speed and reliability are becoming more and more important, also in smaller warehouses. To be able to offer your customers the best service possible, you need insight into your actual stock levels. Exact offers you a new and simple solution for barcode scanning. E-WMS Lite ensures you always have up-to-date warehouse information. This stops people from making mistakes when picking orders, increases your delivery reliability and reduces manual labour.

## E-WMS Lite: for all your employees

Accurate and actual information on your stock for warehouse employees, office personnel (like sales) and the CEO – all combined in one simple and user friendly system. That's E-WMS Lite. Everyone has access to the same information by using Exact Globe Next. Empower your warehouse personnel to carry out tasks efficiently and benefit from management level insight into your stock at all times.

- **In the warehouse** your people know where to find products quickly and what the stock levels are. Picking errors no longer occur. With full control over your warehouse realized, your employees will never need to see an empty shelf again.
- Your **sales team** wants to keep the promises they made to your customers. And now they can, thanks to insight into the

actual stock levels. When your delivery reliability is high, there will be fewer return issues. That saves a lot of effort and increases customer satisfaction.

- **The CEO** has one goal: offer the best customer service. This increases loyalty that can drive further success for the business. An efficient and manageable warehouse is essential. With E-WMS Lite your stock information is real time and more reliable.

## Quickly handle received orders

You want to register received products as quickly as possible and have them added to your actual stock. That goes without saying. With E-WMS Lite for Exact Globe Next orders are sent automatically to the handheld scanner in the warehouse. And when you don't receive the amount of products you ordered,

## Advantages:

- 1 Continual insight into actual stock levels
- 2 Pick orders more quickly
- 3 Support in receiving products, counts and sales orders
- 4 Registration of SSCC at order picking
- 5 Support in printing barcode labels

**= exact**

And it all comes together.

you will receive a notification on the scanner so you can take appropriate action immediately.

### Picking sales orders more quickly

Your order picking is more efficient and precise than ever before. With E-WMS Lite warehouse employees receive picking advice on their barcode scanners. The scanner then sorts out the items per warehouse location. The picking advice on the scanner also takes the end date of a series or batch into account. Urgent orders are placed on the top of the picking advice list to make sure they are handled as quickly as possible. That way you end up with happy customers.

### Shipping

E-WMS Lite supports the international Serial Shipping Container Code (SSCC). This enables you to trace your pallets, boxes or containers with a barcode. E-WMS Lite also ensures that delivery notes are printed automatically, and it supports barcode labelling. Furthermore, the system is integrated with EDI for the electronic transmission of several message types.

### Control over your warehouse

Exact WMS Lite improves your logistic processes. You are able to work faster and with fewer mistakes. And you've got the insight into the actual flow of products within your business. With a quick and efficient process you continually work on improving your customer service.

**Exact Globe Next offers 4 different modules for Warehouse Management. Pick the module that suits you best.**
